**Event Sponsor**

Jeffrey Strickland—(252) 903-3905

Come join your fellow county firefighters at the Randolph County Fire Service HOT (Hands on Training) experience. Fire Personnel from Randolph County are invited to participate in Hands on Training Evolutions that are fast paced, and scenario based to build skill for the varied situations that firefighters find themselves in. This one-day training event will offer multiple training opportunities in a "ROUND ROBIN" style, allowing the firefighter to attend two different sessions in the same training day. **Who are we looking for:** The experienced firefighter who wishes to gain knowledge and expand their current skill set. These courses are not for rookie firefighters; basic firemanship and rescue skills are assumed by the instructors. **What is the cost of Attendance:** No Cost- this event has no registration fee for those who wish to participate. This training is being offered to introduce new techniques and sharpen existing skills by learning from others who have the experience to offer.

### Courses to be offered:

#### **Truck Company Operations**

Instructor: **Tim Layton, Battalion Chief of Training – City of High Point**

*Mid-Mount, Rear Mount Ladders and Engines who serve as Truck Companies*

This training is being offered to provide information and best practices for the use of tower ladders and straight ladders on fire/rescue scenes. The advantages and disadvantages of each will be covered as well as the advantages and disadvantages of the mid and rear mount configurations. Additionally, insight will be given into the abilities that engine companies have when operating as a truck company.

**PPE Required**

*(Multi Company Training)*

#### **Rescue Operations**

Instructor: **Bruce Hodges, Deputy Fire Marshal – Training Specialist NC OSFM**

*Extrication, Stabilization and Advanced Scene Operations*

This training is being provided for participants to receive hands on training in a scenario-based environment. Students will have the opportunity to use modern stabilization and extrication equipment provided by Safe Industries and Paratech Inc.

**PPE Required**

#### **Rural Water Operations**

Instructor: **James Fore, Deputy Fire Marshal – Ratings Specialist NC OSFM**

*Tanker Operations in Rural Water Supply settings - Tips and Tricks*

This training will provide the participant with the opportunity to learn what big water is and when it is needed. This course will cover the steps needed to evolve away from a single tender operation on small incidents to multiple tenders on large incidents. Participants will operate in the role of a water supply officer with the important task of establishing and maintaining water supplies throughout the life of an incident. De-escalation of the water shuttle will be covered as well.

**PPE Required**

*(Multi Company Training)*

## Engine Company Operations

Instructor: **Tim McGough, City of Asheboro**

### *Advancement of Hose Loads and Techniques*

This training will provide insight on attack lines, attack line deployment & advancement, and hose loads and their unique purposes. The course participant will gain a knowledge and understanding of the pros and cons of attack line sizes, proper placement, and advancement of those attack lines at fire scenes and the various methods of loading attack lines on the engine.

#### **PPE Required**

*(Multi Company Training)*

## Advanced Rope Techniques

Instructor: **Jonathan Sowers, NC OSFM Ret.**

### *Advanced Rope and Rigging Operations*

Training tower High Angle Rope Operations...

This training event will allow the attendee to participate in high angle rescue operations. High Lines from drill tower to lower anchor point. Participants will have the opportunity to establish anchor points, set up rigging operations and deploy high lines for the purposes of rescue and/or recovery. Trainees will learn the tools of the trade through top notch instruction and practical applications.

#### **PPE Required**

## Flash Over Simulator

Instructor: **Franky Kelly, Captain – City of Asheboro**

### *Flash Over training, Thermal Imaging, Ventilation*

The participant will gain first-hand knowledge of why flashover occurs and the recognition of when a flashover is about to occur and what it looks/feels like when the event actually happens. This course will provide the student with tips and techniques to prevent flashover from occurring. The importance of proper tool selection, crew integrity, and fireground communication will also be covered.

*A signed release from department Chief will be required for participation.*

**FULL PPE Required with SCBA and Spare cylinder.**

*(Multi Company Training)*

Early Registration will be sent late March for accountability purposes.

**Registration will Start at 7am on Saturday April 17<sup>th</sup>, 2021**

**LUNCH will be available for purchase during the morning registration for anyone who wishes to have lunch at the facility between the morning and afternoon sessions.**

**Ash-Rand Rescue Squad will be offering BBQ sandwiches and BBQ plates for lunch on this day as part of their annual fund raiser. Payment for food will be accepted at the morning registration and the food will be onsite at by 12 pm.**

**Sandwiches—\$5.00**

**Hush Puppies—\$2.00**

**Combo Meal—Sandwich, hush puppies and Soft drink—\$7.00**

**Plate Meal—BBQ, slaw, hush puppies and Soft drink—\$8.00**
