

# An Impactful Storm Expected Through Tonight

**New With This Update:**

- Slight increase in winds today, with gusts to 50 mph possible across parts of the Coastal Plain.**

**Event Highlights:**

- ✓ A strong storm system will bring widespread heavy rain, gusty winds, and a threat for damaging winds and a few tornadoes.
- ✓ Storm total rainfall through tonight will range from 1.5 to 3 inches, highest in the western Piedmont. Locally higher amounts are possible.
- ✓ Isolated moderate to heavy rainfall may lead to minor to moderate river flooding, with isolated/scattered flash flooding also possible.

**Confidence**

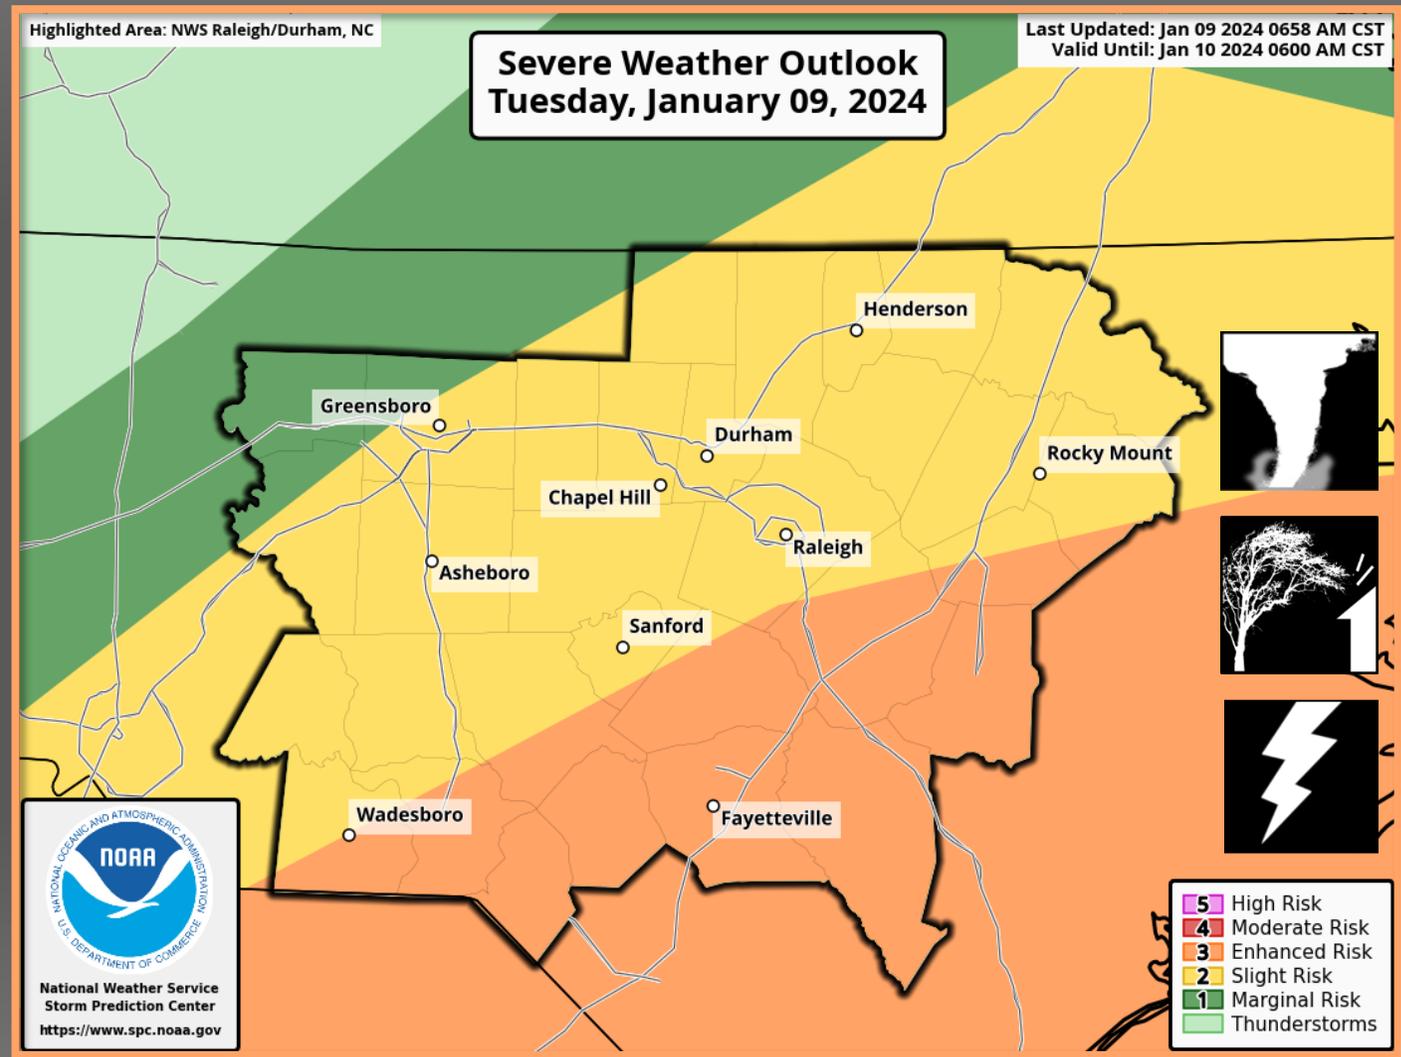

# Severe Thunderstorm Outlook

Threat Level 3 out of 5  
**Enhanced Risk**

Tuesday, January 9th

When Thunder Roars, Go Indoors!

## Overview

- A cluster of strong to severe t-storms will track NE across the area ahead of a westward moving line of strong to severe t-storms.

## Timing

- 1-10 PM, with the risk first across the SW & ending across the E.

## Hazards

- A few tornadoes possible
- Damaging Wind gusts

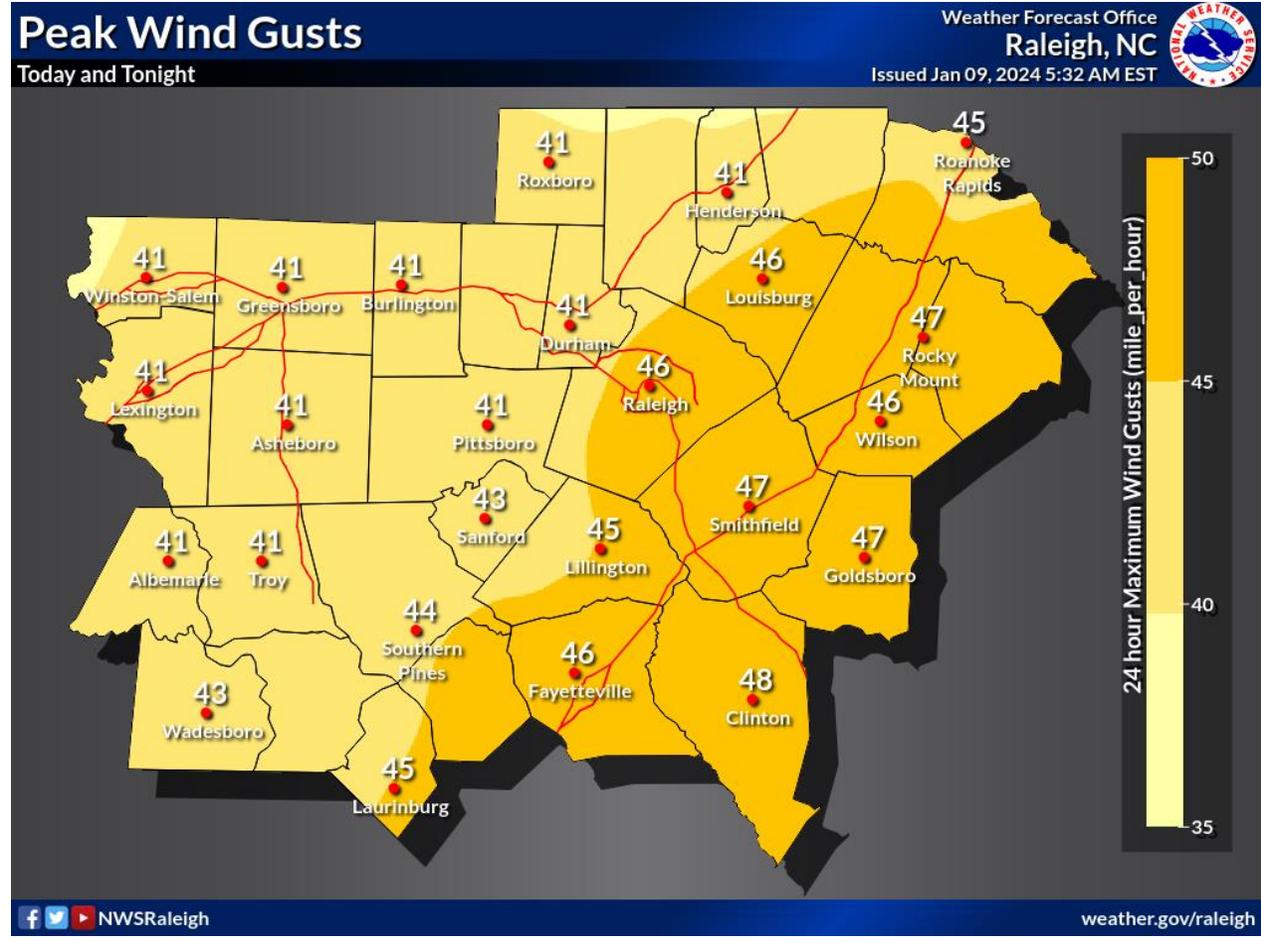

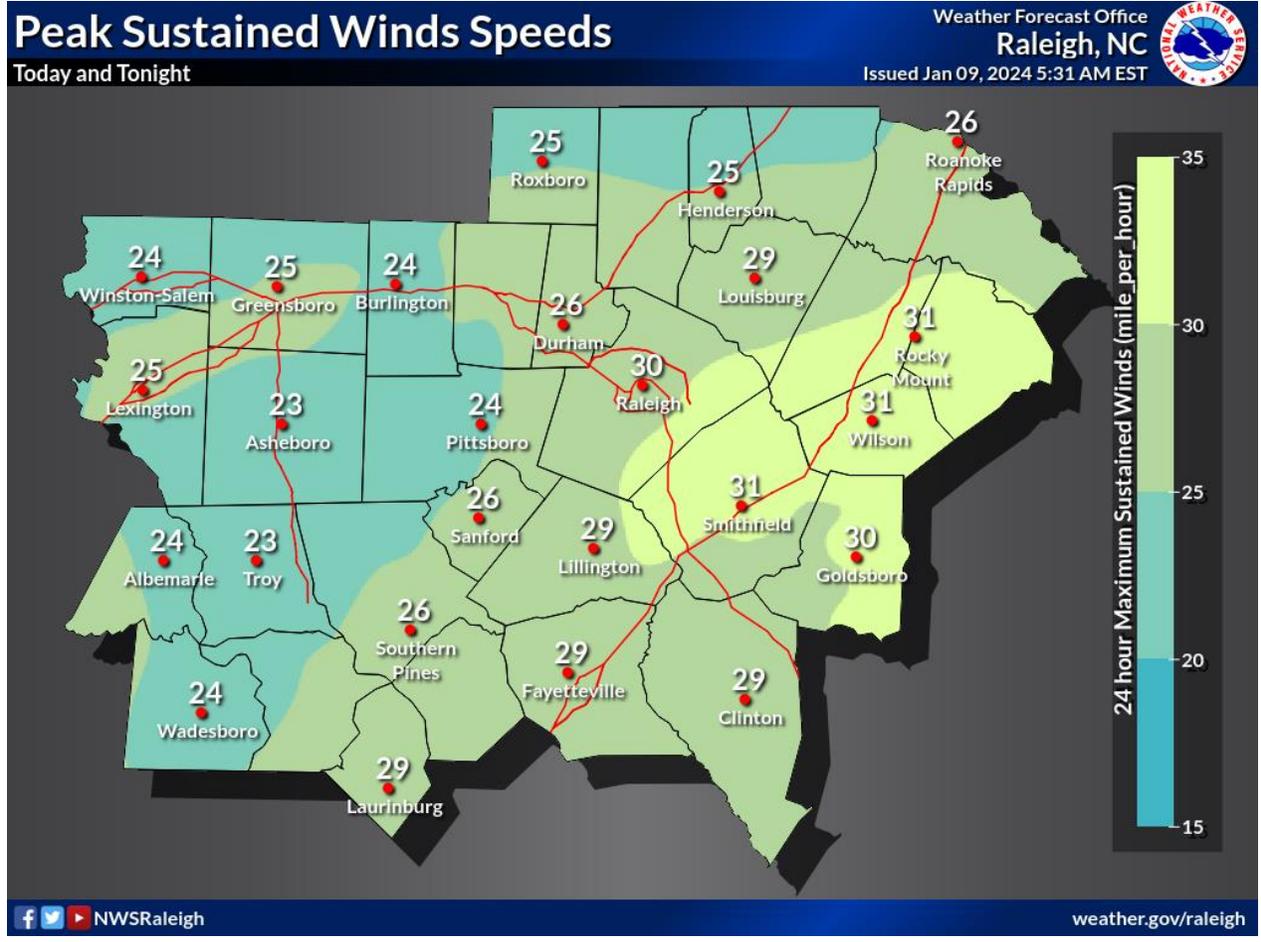

## What does an **Enhanced Risk** Mean?

Numerous severe thunderstorms possible. More persistent and/or widespread, a few intense.

# A Wind Advisory remains in effect for all of central NC, from 10 AM to 10 PM Today

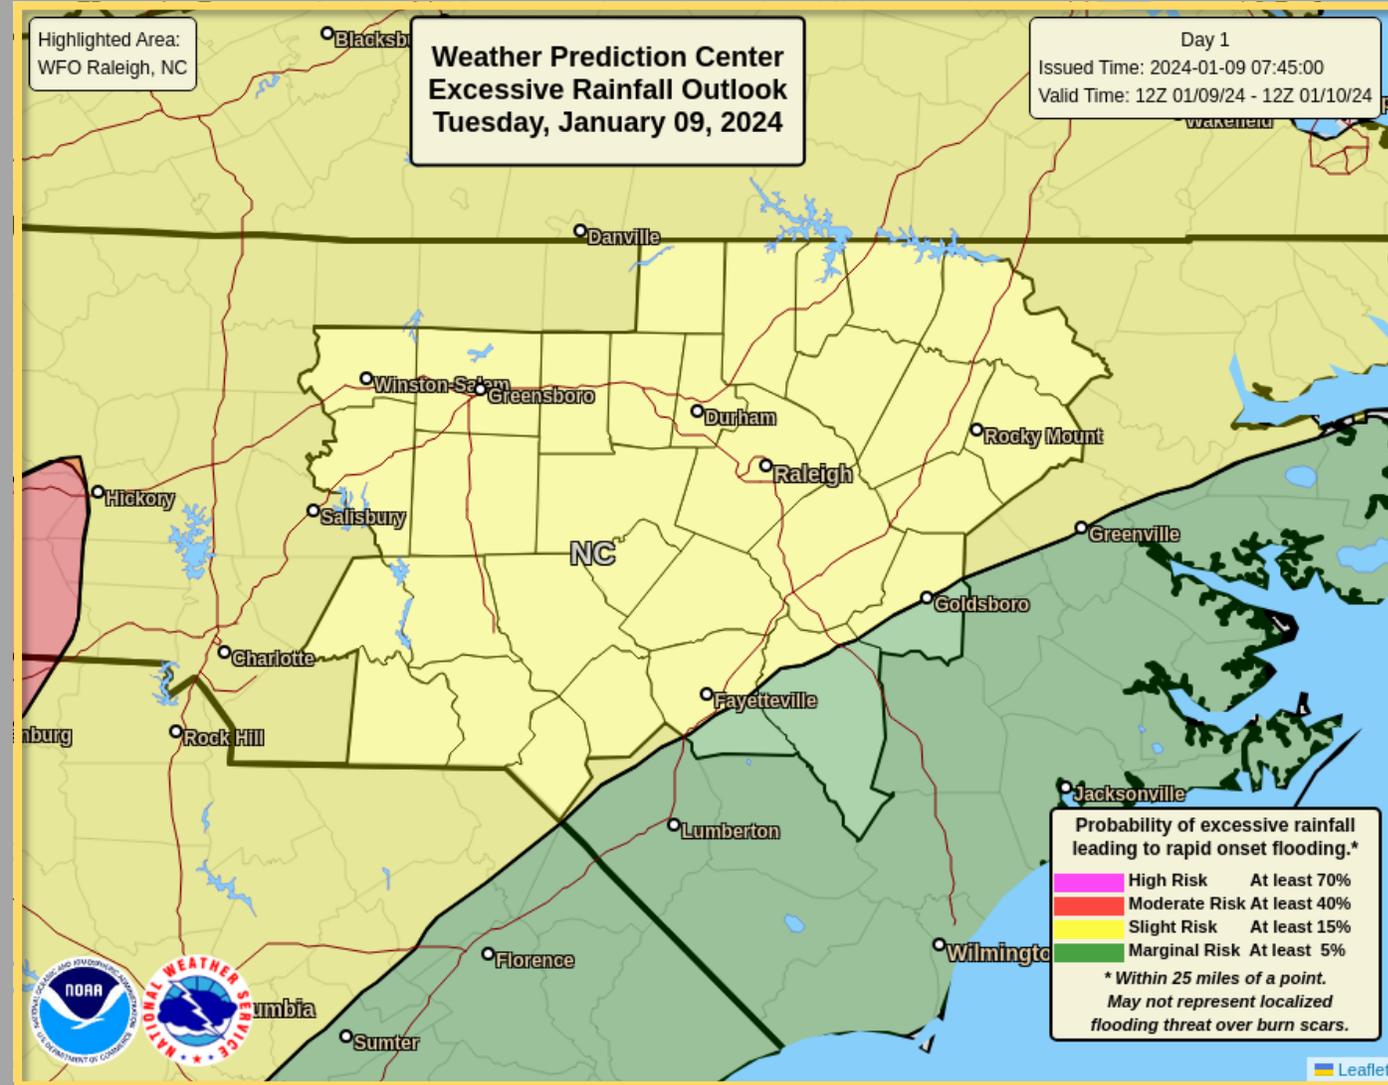

Sustained winds of 20 to 30 mph are likely this morning through this evening. Frequent gusts of 35 to 45 mph are possible, with isolated gusts near 50 mph expected across the Coastal Plain.

# Excessive Rainfall Outlook

Tuesday, January 9th

Threat Level 2 out of 4  
**Slight Risk**

### Overview

- A strong storm system could produce one and a half to three inches of rain as it tracks east through central NC through tonight.

### Timing

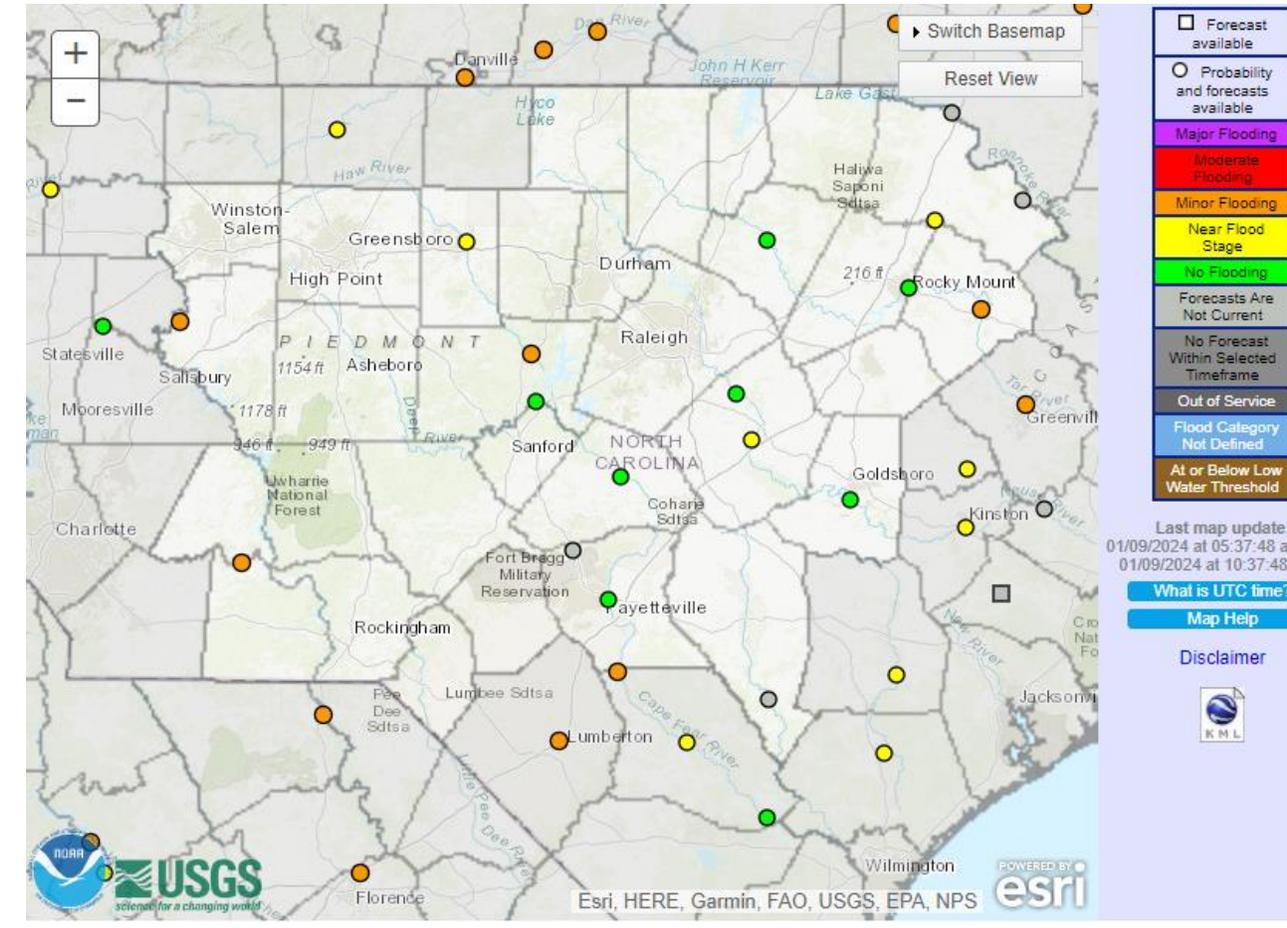

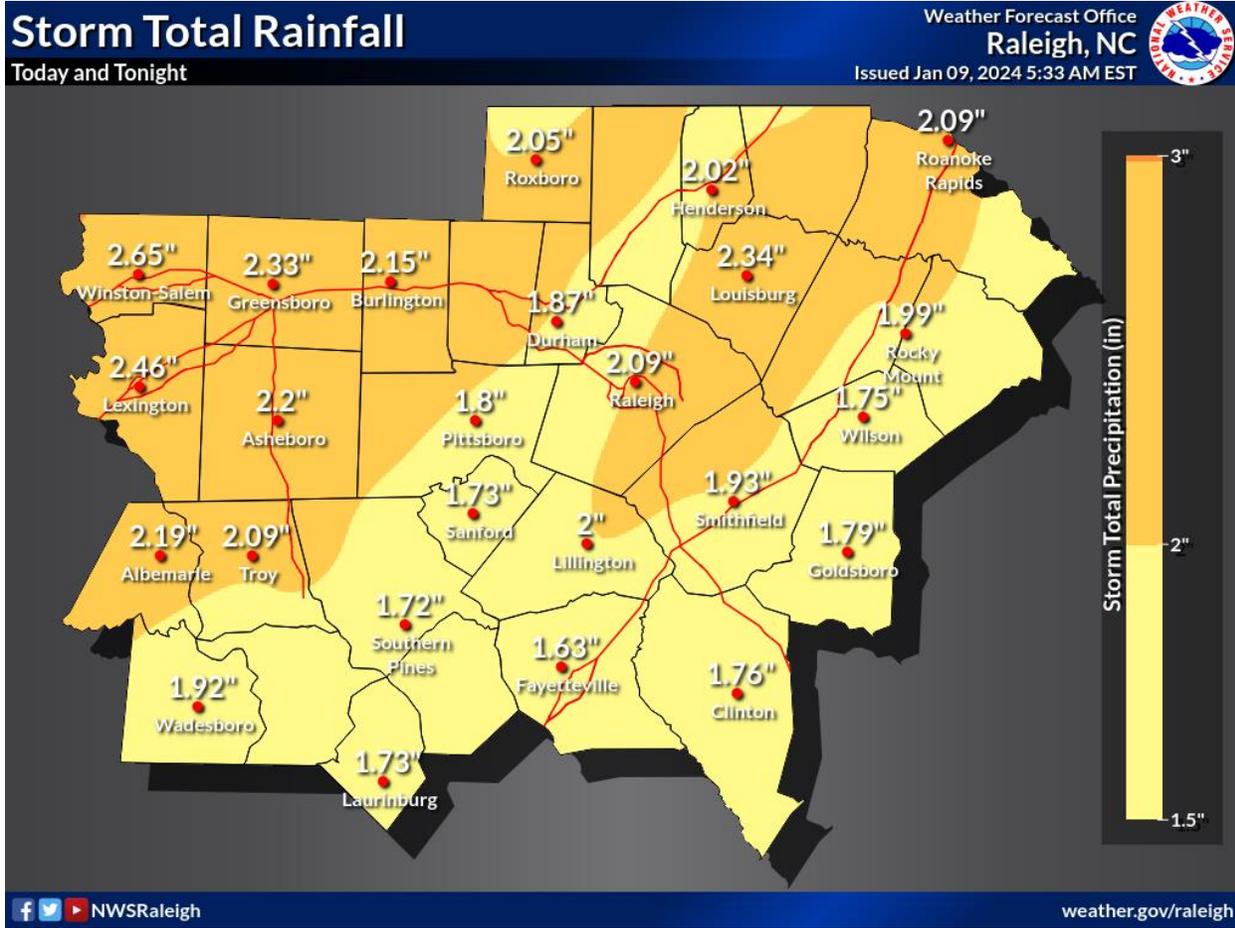

- 10 AM this Morning to 10 PM this Evening.

### Hazards

- Flooding caused by excessive rainfall is possible.

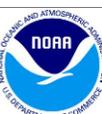

### What does a Slight Risk Mean?

Scattered flash flooding is possible. Mainly localized. Most vulnerable are urban areas, roads and small streams. Isolated significant flash floods possible.

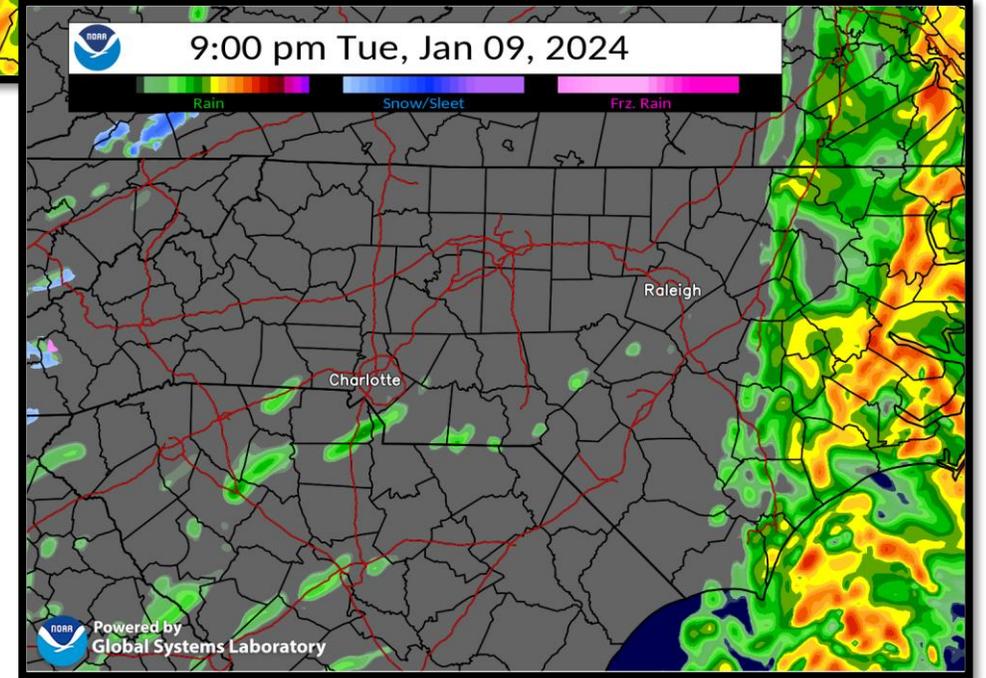

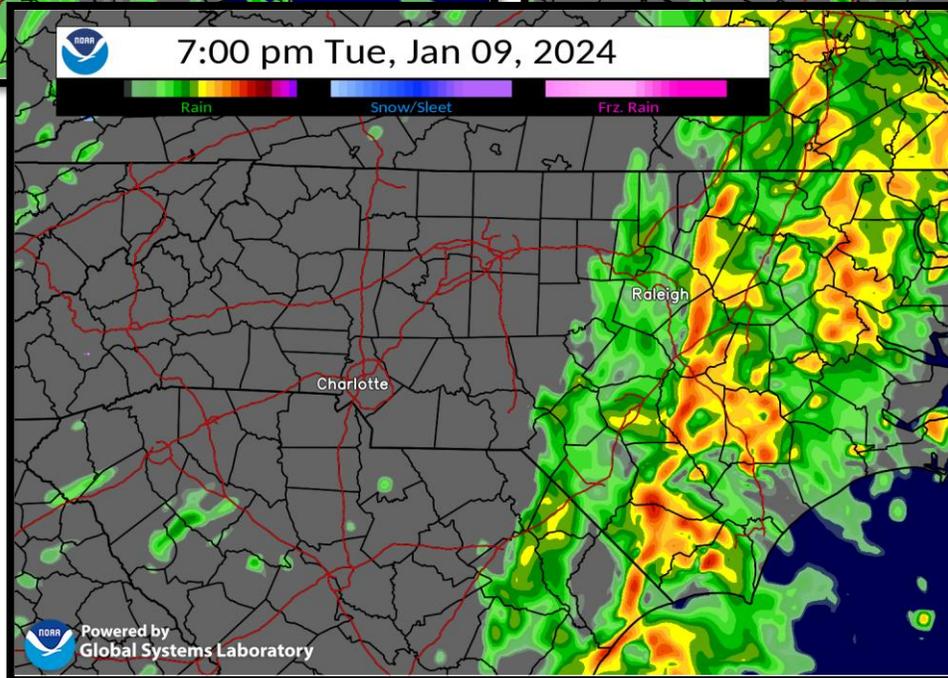

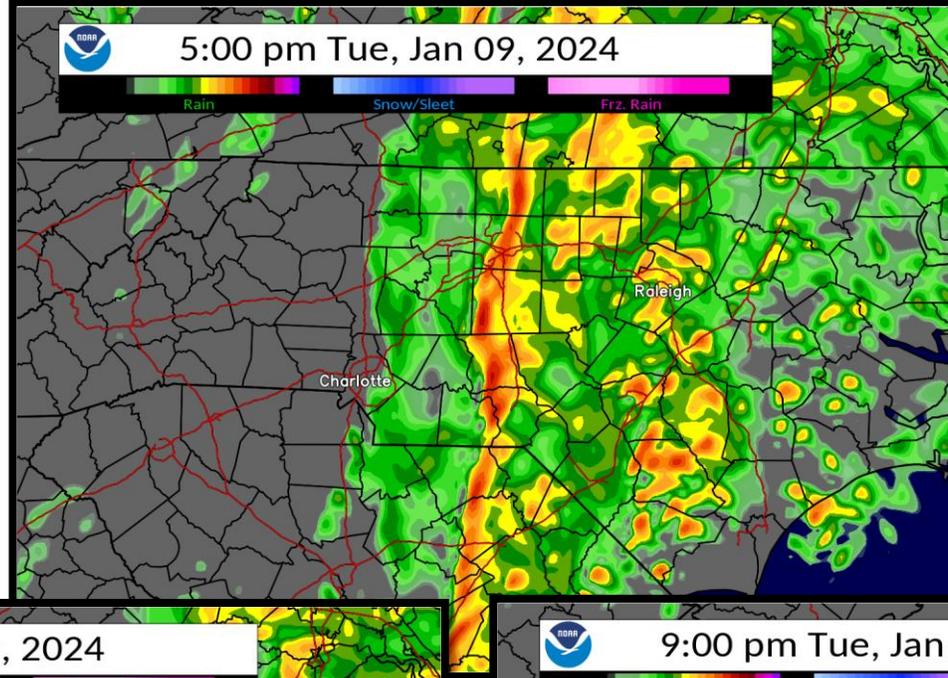

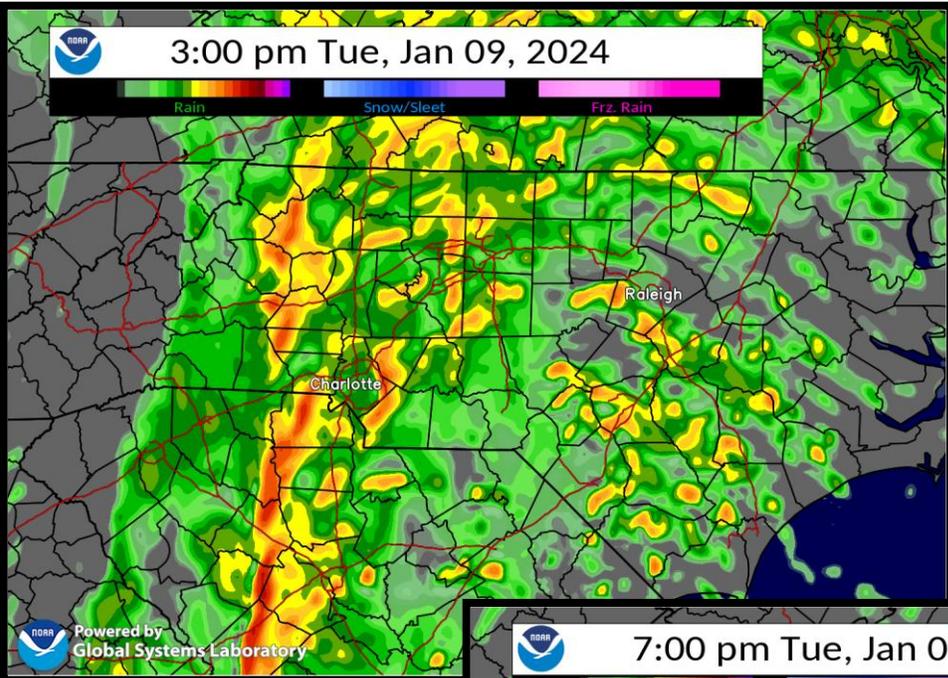

Rainfall totals are expected to range from 1.5 to 3 inches.

Forecast rainfall is expected to lead to river flooding across portions of the Piedmont and Coastal Plain

# Simulated Radar
